

## 12-Week Corporate Study Involving 34 Employees

The Following information was obtained from a FLEXTEND® Study that was performed in 1998. The study consisted of 34 employees from one of the leading projection technology firms in the world.

The following information was obtained from a 12-Week study.

### Test: Post Study Questionnaire

12-WEEK Corporate Program – 34 Employees

***“Will You Continue to use FLEXTEND® as a Daily Preventative Treatment?”***

***25 of 27 (92.592 %) Employees said YES, they would continue to use FLEXTEND® on a regular basis or when problems arose.***

25 of 27 said YES, that they would continue to use FLEXTEND® on a regular basis or use it when problems arose.

7 of 34 were “No Shows” (NS)

1 of 34 said NO.

1 of 34 needed to RESTART the program.

**NOTE:** Because only 27 of the 34 employees were present at time of questioning, the question is based upon the answers of the 27 employees whom were present.)
